2024

VISION

To make every day better for our clients through the transformative effects of water.

MISSION

To improve quality of life, by providing the best selection of hydrotherapy products.

VALUE

Wellness consultants focusing on a new way of life through water.

www.flohrpools.com

Family Owned and Operated, Flohr Pools was established in 1968 when our owner discovered a need for reliable pool construction in the area.

With over 56 years in business and three retail locations in Chambersburg, Hagerstown, and Martinsburg, Flohr Pools provides quality pool construction, trustworthy pool and spa service, chemicals and accessories.

Our products and services include in-ground pool construction, above ground pool installation and a complete line of hot tubs and swim spas. With decades of experience, knowledge and integrity, you can count on the professionals at Flohr Pools for all of your pool and spa needs.

WATER WELLNESS STORY

The Thomas family juggled their hectic lives with work, school, sports, and friends, but they always made sure to reserve one day each week: pool day. This cherished tradition brought the Thomases together, allowing them to unwind, bond, and forge unforgettable memories amidst their bustling schedules.

“Being in the pool has truly transformed my experience with joint and physical pain. The buoyancy of the water has significantly eased the pressure on my joints, making movement much more comfortable and fluid. I’ve found that the gentle resistance of swimming helps me build strength without exacerbating my pain. It’s become a crucial part of my routine for managing pain effectively and improving my overall well-being.”

- Harold

Tranquility
Semi-In Ground Pools

SEMI-INGROUND POOLS

- Great for backfilling
- Perfect for sloped yards
- Can be partially in ground or fully dropped to a certain depth
- Many possibilities on how customer can finish:
Wood Deck / Plain Wall / Back Fill Wall
- H-Style Bead Receiver or Optional C Coping

Pools Sizes:

18' Round
24' Round
7'x7' Square
6'x12' Rectangle
14'x28' Rectangle
All Walls 48"

Installation: These pools are partially submerged into the ground, usually by about half of their height. They can be installed on slopes or uneven terrain where a fully inground pool might not be feasible.

Versatility: Suitable for various types of yards and landscapes, especially those with challenging terrains.

Cost-Effective: Offer a middle ground in terms of cost, making them an attractive option for those looking to balance budget and aesthetics.

Aesthetics: They offer a more integrated look with the landscape compared to above-ground pools. They can be surrounded by decking or landscaping to blend seamlessly with the yard.

No Two Backyards are the Same, Resulting in Your Unique Look!

***We offer Vendors/Landscapers
for Optional Finishes!***

Exposed Finishes

Possible Finishes for Slope and Site Locations

Semi-InGround Pool SIZES & SHAPES

Our Round Pools are 48" deep and available in: 18' and 24'.

Our Square Pool is 48" deep and available in: 7' x 7'.

Our Rectangle Pools are 48" deep and are available in: 6' x 12' and 14' x 28'.

Flohr Pools

PREPARATIONS & INSTALLATION

BEFORE Installation

(Owner Responsibilities)

- Obtain a permit—notify Flohr Pools when permit is in hand.
- Provide garden hose from house to pool area.
- Schedule a minimum of one load of water to set the liner and begin filling the pool.
- Provide 12' access way for trucks and equipment.
- The center of the pool, filter location, and sod locations must be marked for construction crew prior to arrival.

1. Excavation/Grading

- When our team arrives, they will mark and verify the dig area.
- A site survey is required prior to installation to determine the best approach to create level ground. If your yard has a slope, there will be a high side and low side.
- Flohr Pools must create an overdig of level ground.
- The bobcat will strip sod and level the pool area plus 4' beyond the perimeter of the pool.
- All sod and additional dirt will be placed on site at the marked location.

2. Base Preparation

- Locate and level the vertical support slabs
- Place and secure the bottom track
- Lay sand for the base of the pool

3. Installation

- Vertical supports and walls are put into place.
- Foam is laid at the base of the pool wall to protect the liner.
- Rolling and/or tamping of sand is completed.
- The liner is placed, stretched, and secured to the top rails.
- The skimmer, return, pump, and filter are installed.
- Finished filling of your pool and scheduling of final inspection.

AFTER Installation

(Owner Responsibilities)

- Electric and bonding connections
- Final inspection
- Landscaping

Installation is available!

Installation/Included/Standard

- 12" Vertical Grade Excavation
- Limited Grading
- Base
- Support (Upright Support Slabs)
- Liner & Filtrations Equipment Installed

Not Included-CUSTOMER RESPONSIBILITY

- Rock
- Water
- Electric
- Permits
- Entrance-Reasonable Access Required
- Fill Dirt Location
